140.013 Investment Policy for Endowment Pool

Bd. Min 7-22-11. Revised in entirety, Bd. Min. 6-26-12. (Note: Board approval on 6-26-12 replaced previous rules 140.010, 140.011, 140.012 and 140.013 with new language and

reissued new rules 140.010 through and including 140.016. (Revised Bd. Min 6-14-13; Revised 9-12-13; Revised 6-25-15; Revised 2-4-16; Revised 4-14-16.

- A. Introduction -- The University's Endowment Pool contains gifts, bequests and other funds directed to be used to support a University program in perpetuity. Some donors require such a commitment as a condition of their gift ("true endowments"). Also, funds may be assigned to function as endowments by the Board of Curators or by University administration ("quasi endowments").
- B. Responsibilities and Authorities –See CRR 140.010 Policy for Management and Oversight of Selected University Investment Pools
- C. Investment Objectives --The Endowment Pool must be managed to provide ongoing support of endowed programs in perpetuity, in conformance with donor stipulations. To accomplish this, investment returns, net of inflation, should be sufficient over time to cover annual spending distributions while maintaining or growing the underlying purchasing power of each endowed gift.
- D. Authorized Investments –The Endowment Pool shall be invested in externally managed funds, consistent with the guidelines established in CRR 140.011 Policy for Investment Manager Selection, Monitoring and Retention,” in the following asset sectors:

Portfolio Rebalancing

Sector allocations shall be monitored on an ongoing basis as changes in market behavior may result in variations from the target asset mix. Rebalancing of the portfolio shall be considered at least quarterly and more often if necessary to maintain allocations within the allowable range. The need to rebalance shall take into account any logistical issues associated with fully funding a particular asset sector, as well as any tactical decisions to overweight or underweight a particular asset sector based on current market conditions. The University may utilize external managers to synthetically rebalance portfolio exposures consistent with targets and allowable ranges established by this policy. Synthetic market exposures can be obtained through the use of conventional derivative instruments commonly accepted by other institutional investors, such as futures contracts and swap agreements.

Actual sector allocations shall not fall outside of the allowable ranges, with the exception of violations caused solely by periods of extreme market distress, when it may not be possible or advisable to immediately bring such allocations back to within the allowable ranges.

Currency Risk Management

In the context of a global investment portfolio, currency risk exists to the extent that

levels. The allowable range of the portable alpha portfolio shall be 10% of the total Endowment Pool.

The Global Equity Portable Alpha Program shall be managed in accordance with prudent risk management practices established by the Treasurer, Vice President for Finance, and Investment Consultant. Such risk management practices shall include a requirement to maintain appropriate levels of margin collateral. Derivative instruments and associated cash and cash equivalent balances shall be managed by an external investment firm with appropriate expertise, experience and depth of resources.

E. Spending Policy –To provide ongoing support to endowed programs in perpetuity, the spending policy must be managed in conjunction with investment objectives and other factors in compliance with applicable law, such that the spending rate plus an inflationary assumption shall not exceed expected investment returns over time. At minimum, the spending policy should be reviewed in conjunction with asset/liability studies performed by the Investment Consultant not less than once every three years.

1. The formula used to determine the Endowment Pool spending distribution for each fiscal year shall apply a rate of 4.5% to a base equal to the prior trailing average of market values as of December 31 of the prior fiscal year. Endowment spending distributions shall be paid on a monthly basis.

The transition of the rate from 5.0% to 4.5% shall be accomplished in a methodical manner over a period not to exceed the seven years ended June 30, 2019. In no case shall the transition from 5.0% to 4.5% cause the actual spending distribution to decrease from one year to the next during the transition phase.

2. In addition to the spending distribution noted above, the Board of Curators shall have the authority to deal with any other matters that may arise in connection with the Endowment Pool.

Currency Risk Management

In the context of a global investment portfolio, currency risk exists to the extent that investments contain exposures to foreign currencies. The desirability of this currency exposure is not necessarily aligned dollar for dollar with the desired exposure to assets denominated in foreign currencies. As such, external managers in any asset sector may implement currency strategies to alter the currency exposure of the portfolio when deemed prudent to do so in the context of the particular investment mandate. In addition, the University may utilize external managers to implement currency strategies to alter exposures in an active or passive manner as part of a portfolio or asset class overlay when deemed prudent to do so.

Global Equity Portable Alpha Program

Within the global equity sector, market exposures may be obtained through the use of passive investment vehicles, traditional long only active management, active long/short strategies and conventional derivative instruments commonly accepted by other institutional investors, such as futures contracts and swap agreements. Equity market exposure obtained through active long/short strategies and derivative instruments shall not exceed 15% and 35% of the total global equity allocation, respectively.

To the extent that equity market exposure is obtained using derivative instruments, a

portion of the underlying cash and cash equivalent balances may be managed in an active fashion by external managers as an additional tool to add excess returns above the global equity benchmark. To maximize the probability of consistently positive returns within the portable alpha portfolio, appropriate alpha strategies should exhibit low correlations to one another, and manage effective equity market beta to target levels. The allowable range of the portable alpha portfolio shall ~~10%~~ of the total Retirement Fund.

The Global Equity Portable Alpha Program shall be managed in accordance with prudent risk management practices established by the Treasurer, Vice President for Finance, and Investment Consultant. Such risk management practices shall include a requirement to maintain appropriate levels of margin collateral. Derivative instruments and associated cash and cash equivalent balances shall be managed by an external investment firm with appropriate expertise, experience and depth of resources.
